Comments: As a motorbike user I feel that everytime a project like this comes up we get area taken away to ride. We need viable single track riding areas to stay open. I understand some trails can become unsustainable but instead of just closing them outright, an effort should be taken to reroute them so we can still enjoy them. As a PANTRA member we as a club have done thousands of hours of trail clearing in the panhandle and especially on Canfield system. I carry a saw when I ride knowing I can make the trail better for all users. Just asking that our right to right the trails is not forgotten in this process as we are a vital part of sustaining the trails for all users.
