Comments: Are comments on the Dead Laundry Project still being accepted?

I am a property owner on Deception Saddle and wonder what the extent of Fuels Treatment and Vegetation treatment bordering my property would look like? Currently we have a nice buffer of trees and vegetation as to not see our neighbors, if this was all cut and cleared it would become a direct line of sight from one cabin to another. Are you better able to explain this to me what these "Treatments" might look like between cabins? (specifically our property and the air strip of Brazingtons.
