Comments: As a native born and raised in CDA I'm super happy to see projects like this come to life. Many people here love the natural beauty we are surrounded with. Many literally live to go play in the woods whether it be hiking or biking. As more people move here I see a huge need for more trails. Specifically bike or bike and hike only. As someone who has worked on local trails I see it takes the effort of many to keep trails in good shape. As an avid Mountain biker I see a project like this and hope that we use common sense in how it's built and who it's made for.

If at all possible, I think we need trails that are directional and even specific trails for downhill mountain biking only mixed with hiker only and moto/mtn bike only. The mountain bike community is very large here in CDA. With new trails many will come visit to ride from Spokane and other places. This brings in revenue to local bike shops, restaurants, breweries, etc... I would love to be part of this project if possible. I'm good with a shovel!
