Comments: I just wanted to pass along my support for this project. I appreciate the USFS considering the recreational and social aspects of the project area alongside the primary focus on the forest health and environmental aspects. I support any element that improves trail maintenance including development of new trails. As this area becomes more and more popular for recreational use, I fully support a new non-motorized trail system on the north side of Canfield Mountain. I further support the re-routing of some trails to minimize environmental damage and to minimize conflicts between the many types of trail users.

Thank you for the consideration of my comments.
