Comments: I oppose "Alternative 2" of the Forest Service's proposed Ochoco Wild Horse Herd Management Plan EA, as it will result in the elimination of this herd! These horses have maintained their numbers at about 130 individuals year after year, with no resource damage to the public land they inhabit. The AML should be raised to at least 150 horses, with humane, reversible fertility control as needed. Under no circumstances is brutal surgical sterilization acceptable as this CAN BE FATAL!!!!!!
