Comments: My husband's family own a beautiful little cabin right outside of Centennial where this project is being considered. The cabin and the surrounding area is used and enjoyed by our whole family, and it is very upsetting to think that this place could drastically change for the worse. Sometimes you have to question "Why here?" The beauty of this area is enjoyed by so many people, and the value is understood by all that spend time here. After looking at the comments and reading through both sides, I feel it is very obvious (common sense) to why we should leave this area alone and let it continue to be the place it has been for many years to come. Listen to the people who use it.
