Comments: I have no comments or concerns surrounding the environment and trust the parties involved will make appropriate decisions. My concern comes from the ski industry aspect. Will Lutsen remain independent and affordable to its current clients? Or will this turn into a subsidiary of one of the new ski conglomerates (Parent companies of the EPIC and IKON passes) and lose its connection to the North Shore and the midwest. There are pros and cons to being affiliated with a multi-resort pass, but there's potentials for the cons to severely outweigh ANY of the pros if Lutsen lost sight of their origins and values.
