Comments: I feel our public non wilderness areas need to have a balanced use, including controlled logging. And off road use of vehicles. Many citizens that also share ownership of these land are disabled and can not visit or see much of these lands if they can not utilize some sort of vehical.
I do condone wise use and maintenance of trails and a fully supported effort to pack trash out.
These lands are a trust for all Americans and all have equal rights to,use them but they need to be managed in sustainable manners, and control pact, but these lands need to also be open for recreation, hunting, some economic activities that do not permentaly harm the land and reasources.
