Comments: The Ski Area expansion project has great ambition. Would love to see some of it completed before my ski days are over. I do have one request or suggestion that I believe many people would be in agreement with me is....Please change the Bridge chair. It is old, scary and I am pretty sure past its recommended years of service. The lift is slow, the seats are warped so you could easily slide off and no safety bar!! That is your only connection to the lodge area if you want to ski those hills and also the connecting chairlift if you choose to ski back from Moose Mountain. I actually avoid that area because I do not like riding that lift, as do many others. This chair lift should be changed immediately.
