Title:
Comments: I oppose this project because:
It is too large and would impact too much of the forest
It would allow far too many new roads
It would destroy wildlife security areas, old growth forest, and roadless areas
We need to know where all this clearcutting, roading, and other activity would be allowed and what impacts it would have before we decide whether or not to approve it.

This is barely different from the initial proposal - I am disappointed that the revision does not incorporate a lot of strong comments given.
