Comments: I object to the entire lava #51255 proposal. Also to the fact that this is put forth in a time when self isolating is occurring. The fact that Sheep Mountain Federal Game Refuge(SMFBGR)is once again split into more and separate management areas is wrong. The Presidential proclamation set SMFBGR land aside for wildlife and should be removed from the LaVA project. The fact that this area is used for full on motorized use is alreasy in direct violation of the proclamation. Mechanical logging in the SMFBGR under what ever name would be the same thing. If the USFS is unable to understand the one page SMFBGR proclamation then the 4 1/2 lbs of paper work in the reissued draft record of decision will evaporate as well. We already have a system to protect our forest. I feel as though the public is being asked to give a blank check to the forest service over a 15 year vastly oversized project. There is great diversity within this vast area and there needs to be separate considerations with NEPA process on each diverse area. Al Johnson
