Comments: Please leave the ochoco herd alone. They have a history of maintaining themselves. There is more than enough land and plenty of feed for the horses. Limit sheep and cows in their areas and there would be no problem. The plans that you have proposed cost a lot of money and will genetically destroy these hearty and naturally healthy horses. This herd deserves to be left alone. Please stop trying to eliminate the wild horses that inhabited this land before we did. We are not god. Leave them alone!
