To the Forest service I'm writing this letter to tell you please leave the Ochoco Horses alone. Your ways of handling these horses are going to make them extinct which angers me.

You see my family loves to drive up to the Ochoco National forest and we love seeing the horses. I would love to bring my future grandchildren, but with your proposed ways I can see that not happening. Another words I think your ways are unacceptable based on what you have put out to the public. If the horses for some reason are removed, become extinct with implementation of your plan we can't afford to drive to another area to go see them. These Horses are therapeutic for me and my family. These horses are very dossal for viewing you can see they don't bolt off. Also there is enough forage for all the animals, So once again you're wrong. The department of Wildlife has also Introduced wolves into the area which In turn is decimating the herd along with the elk and deer and other wild wife and now you want to do this? YOUR WAYS WILL definitely make the herd extinct. I have personally seen cat tracks, and wolf tracks tracking down these horses. I have seen these horses along the 4210. With Snow up to their bellies. I don't Know what you're trying to pull but your facts are biased. I will not stand for this or will I put off with this. Because you work for us , we the people. You're a PAID PUBLIC PAID SERVANTS. You work for the Public! Do the right thing and leave them horses alone, leave them at their current number. Don't worry the wolves and cougars will get them, soon enough so the numbers will go down. There is your form of birth control.
