Title:

Comments: I am strongly against this huge project due to the negative impact to the environment, wildlife and water quality, as well as the quality of life of Cook County residents. This land is much more suited to hiking, berry picking, snowshoeing and forest bathing than it is to commercial development that will only benefit the bottom line of Lutsen Mountains Corporation. It would be a travesty to give up the land for the enjoyment of many for the profit of a few.
