Comments: I would love to comment. as an employee and an avid skier, who would love to see expansion, BUT in this case.... I think its a terrible idea for Purgatory. They barely open the lifts we have, they have no staff, they hardly open our beginner terrain, including Columbine for the fist 6 weeks, they almost never open lift 4 (which has to be replaced) and has AMAZING beginner terrain. they built the surface lift on the back side that never runs, and a coaster that is useless. They also barely ran lift 2 the entire year. Oh and almost all food places were closed during the holidays and spring break.

Supporting them adding more terrain and tearing down trees and habitat that probably won't get opened is not ok. We don't run at full capacity with what we have. Why not redo the bottom of the mountain to make more options to get down, and make sure the mountain can handle it before we do more. Put in more magic carpets, ditch the tubing park and give a tow rope and terrain, and OPEN WHAT WE HAVE.
