Comments: Dear Forest Service,

There is nothing more important to me than caretaking our wildlands for the future. In addition, with climate change as a threat to all of our futures, keeping as many trees in the ground, and keeping forest healthy are essential. Please do not log this forest.

The scale of this project means an environmental impact statement must be completed first! There is plenty of clearcutting and logging on private lands and your responsibility is to the future of Washington's forests and communities. The necessary new road construction alone is also incredibly destructive for the surrounding forest that remains.

My gratitude is immense for your consideration of these issues, and for listening to what the people of Washington State really want.
