Comments: Hello, I'm sending a message to urge you NOT to log 1800+ acres in North Fork.

I have grown up in this state and frequented North Fork Nooksack since I was a child. These woods are extremely important to me and many other residents. Every forest ecosystem we can preserve is a win for our unique state. Having 44% of forested land in the state is something our citizens take great pride in. How we treat our forests and public lands is a reflection of our character as a community, and with the state of the world, now more than ever this resource must be cherished and preserved.

Thank you.
