Comments: It is extremely vital at this time to protect our assets- the trees need to stay standing. The ecosystem deserves protection as it protects and provides for our lives. I'm exasperated that this is even a consideration. Please save the trees! We need them alive and providing clean air and water. There is way more value in the land as it exists now as a resilient diverse landscape that is irreplaceable. Thank you for recognizing the forest for the trees and allowing it to continue to grow unharmed in spite of the dangers of other humans who just don't understand it's true value. Thanks for listening and for taking action to help protect the natural world.
