First name: Becky

Last name: Knight

Organization:

Title:

Comments: Please do not log this area. The scale of this logging project and the fact that we will clear cut this area means we will forever change the landscape of this area. As we enter a critical time for climate change we need to be slow and thoughtful about what we take from the earth. Clear cutting will take away habitat, tourism and oxygen producing resources from our county. I ask you as a private citizen to not alter the land we live near in this way. There is another way to log our area.
