Comments: Please do not allow this logging to take place. It will be detrimental to the already damaged Nooksack river, and I still remember when Mt. Baker highway was closed off for the landslide that was caused by the extensive logging on Mt. Sumas a few years ago. This is a bad idea. This is beautiful national forest that is designated so for a reason, and long-term damaging action should not be performed because of the vagaries of a temporary political situation. It needs to be left to the wild, the huckleberries have already found their best way. I don't trust the reasons given here: <https://www.fs.usda.gov/project/?project=58218>.

To be clear, I am against this action.
