Title:

Comments: To whom this may concern,

Please STOP the proposed logging in Mount Baker-Snoqualmie National Forest. Please save our forests, streams, nature, and wildlife. This precious life is irreplaceable. I speak on behalf of the trees, plants and animals that are unable to speak for their lives and their homes. This will not only have a negative impact on them, but also to our human communities. We are living in a critical time where we need to focus on regenerating and saving our planet, NOT destroying it more than it already is. Science continues to prove the dangers climate change has on the well-being of all living things and this planet due to destructive acts like these, that can not be undone. PLEASE STOP THE PROPOSED LOGGING IN Mount Baker-Snoqualmie National Forest!

Respectfully,

Jasmin Abbott
