Comments: We cannot continue to destroy our National Forests . Doing so will drastically impact our communities, environment and ecosystems in a negative way . Logging and deforestation at such a large scale will be extremely destructive . The forest service needs to fully weigh the importance of climate change and our local ecosystems and how they will be impacted. I oppose any construction of new logging roads , including temporary roads as they aid in the destruction and encourage the growth of invasive weeds. It is bad enough the scale of which logging is being done on private and state lands . Please save our National Forest .
