Comments: I greatly oppose this massive logging effort in the Mt Baker corridor. The forest is important to me as a means of recreating and an escape from life in the city. This will create a lasting scar on the landscape, we don't need to make our national forests the patchworked mess that the DNR has made. Your proposal says that you want to remove trees to "improve wildlife habitat"??? This is the most absurd statement I have ever read. If you want to "improve forest stand condition" leave it the hell alone, nature doesn't need your "help". This is about money... find it somewhere else, this resource is way more valuable standing than cut down.
