Comments: I am furious that the North Fork Nooksack River/tributaries area is even being seriously considered for ANY scale of logging! I utilize this area for camping, sightseeing, and rockhounding, and any development or logging would eliminate opportunities for enjoyment for me and many others who adore this region! The Trump administration is seeking to maximize extraction of natural resources on PUBLIC lands while it still, probably subjecting it to clearcutting, commercial (and unnatural) thinning, and heavens know what else. Do NOT let this ravaging of our precious public lands to take place! I'm a registered voter, and I WILL remember how this vote goes, and WILL let my fellows know of it, as well.
