Comments: Please do not cut this forest. It's pristine form is a natural resource more valuable to the surrounding communities than the wood that would be sold. Most of that money will go elsewhere anyways. But that forest, it brings the people into those towns along hwy 542 and fuels their economies. Clear cutting it could be devastating, especially for summer time tourism. River use, camping and hiking will all be aesthetically and spiritually depleted, and people will use them less. This is all without mentioning the massive impact on wildlife and the river's health.

This will go down as a massive mistake if it actually happens.

Our country already looks dumb enough.
