Comments: I think this project goes too far. It needs to complete an EIS before proceeding.

The Forest Service should take into consideration the value provided by large areas of vegetation as both a carbon trap and a testament to the world we love.

The Forest Service must prioritize allowing our National Forest to mature naturally for carbon capture, clean water, sensitive wildlife habitat, and compatible recreation. Additionally, the Forest Service should cease and desist the use of all decaying forest roads.

Thank you for this time and consideration. We all must do our part to win the fight on Global Warming.
