Comments: To whom it may concern re: logging along the North Fork of the Nooksack River. Please reconsider your proposal to do extensive logging and unnatural thinning in this area. The impacts of this will be devastating to local ecology, would impact the dangers to climate change. Adding more logging roads would increase erosion and fragment habitat. I don't truly believe i Need to list all the reasons of how this would negatively impact our environment because I believe you know them. You must also know that this negative consequences outweigh the financial gain that would come from this project and the impact would be lasting for generations to come.
