Title:

Comments: I lived in Whatcom county for many years and admired it's beauty and seclusion by the surrounding forest. Science has proven time and time again that climate change is not coming anymore, it is upon us. I realize most of governing parties, especially in the U.S. right now, are more concerned with profits over people. I cannot begin to imagine the world of future generations if such horrible acts against Nature should continue and go unchecked. Please think our your child and their child and what kind of world you would want them to experience. We are living in the year 2020 and yet we are unable to save our forests by coming up with sustainable new ideas or techniques besides clear cutting life-giving forests? We in Whatcom county will once again fight for our forest, myself included. Thank you for your time.
