Title:

Comments: I'm deeply concerned about this proposal. Clearcutting such as this has a significant impact on climate change, our region's most serious threat. This logging removes massive carbon sequestration potential, increase the threat of wildfires, and impacts sensitive wildlife habitat. We rely on these forests for clean water, recreation, and their carbon sequestration. I am worried about the scale of this project and lack of Environmental Impact Statement as well. This proposal would do irreparable damage to our state's valuable, essential, and beautiful forests.

Thank you for considering the natural and human world as you move forward.
