Comments: The areas surrounding Mt. Baker and the Nooksack River are sacred areas of beauty and rest to Washington residents and visitors alike.

Logging this area is ridiculous-it will contribute to erosion, flooding issues, and will take away tourist dollars from the state. No one wants to visit a mountain that has been stripped of trees and devastated by clear cutting.

Please don't buy in to a one time, small-minded source of cash-you all know damn good and well the long term issues that arise from clear cutting.

Don't give in to this.
