Comments: I'm in shock. I just read out your irresponsible proposal to clear cut the trees in our valley. Are you going to have an environmental impact study? This is the people's land. It doesn't belong to private industry. The harm this would cause to the river would be astounding. But you know that. I believe you know what harm would be done to the flora and fauna of our valley if you this horrendous thing. Is your greed so monumental that you would do this anyways? Do you think the people of this valley are going to sit meekly by while you rape the forests? Think again.
