Title:

Comments: Please do not allow this logging in to occur. This is a pristine wilderness and needs to be preserved that way as it has been for many hundreds of years. Just because Trump wants to get in there to get his business established before his reign of anarchy is over does not mean that the forest service must band. Please stand tight and not selling this land for timber or pop. Do not allow logging industry into our national forests. It's not an opinion this is a necessity. Thank you for considering this please write me back so that I know that you have received this letter. Thanks, Jeff Greiner
