Comments: I fully support the Camp May water pipeline project. The availability of water to the ski area has many benefits. The additional water would enable the ski area to increase their snow making, during the winter months. This would enhance the experience for skiers, snowboarders, and others who enjoy the mountains in winter. The added snow pack would provide a gradual runoff in the spring, which would be beneficial for the mountain foliage. The additional foliage would provide food an d shelter for the animal inhabitants. In addition, having a steady source of water would greatly reduce the chance of future uncontrollable fires in the area, as we have experienced twice in recent years. This project will be beneficial to all who live in or visit the Los Alamos area.
