Comments: It is absolutely wrong to cut more of our old growth forests. We need to protect the wildlife and birds that are dependent on this relatively old growth forest. We need to keep mature forests in place to help prevent global warming. This is not the place to allow lumbering. Some of our National Forests need to stay virgin(or relatively virgin) and nature needs to be allowed to follow its course rather than clear cutting.I have hiked in this area several times and it needs to not be logged.
