Title:

Comments: Please reconsider this logging project. It is so important for us to protect and preserve our natural places, for dozens of reasons- protecting the Nooksack and its tributaries/maintaining good water quality, minimizing carbon emissions, avoiding creating fragmented habitats, etc. Clearcutting in particular is incredibly detrimental and can lead to all kinds of issues with erosion and even landslides. It's so important to maintain the water quality of the Nooksack for all the salmon that run up it. We don't need to stress even more an already stressed and fragile ecosystem.

Thank you
