Comments: I totally disagree with this project.
There are already too many people on this mountain.  They leave trash everywhere.  The people that use the mountain in both summer and winter are rude to other types of users.
What impact would this have to the mega bucks that were spent to bring back the cutthroat?

How about the additional water and mud it will bring to the area with the building of this.
Is there really a need for another lift in that area?

Please rethink this.
