Comments: I am opposed to this large scale logging along a scenic byway for many reasons. Given the huge impact to our regional ecosystems and human and wildlife communities, this project must include an Environmental Impact Statement (EIS). It is disconcerting that the process thus far hasn't followed the Forest Service Management's standard processes. Has the impact of climate change even been considered? What logging practices will be used -- selective harvesting versus clear cut? Thank you for allowing me to comment.
