First name: Karson

Last name: Voss

Organization:

Title:

Comments: This is not okay. I know for a fact that those that are for this logging have the demeanor of pure profit and resource collection. This is not okay. Deep thought needs to take place in what this movement will do for the ecosystem there, and for the community there. The logging of this area would pose a threat to the salmon population and effect all the animals and people altogether. Salmon as a resource is vital to this community. Please do not do this.
