Comments: I understand timber business to be a regenerative industry and I'm thankful for the labor it can provide. We all use paper products and oil products but when it comes down to it we say "no! Not I'm my back yard!"

I'm not petitioning here to say never log again. I am hopeful that the USFS and other private entities will reconsider the acreage of this proposal and lessen it. Everything in balance.

Thanks for the opportunity for us to speak on the subject. Please considering logging small parcels
