Title:

Comments: "North Fork Nooksack Vegetation Management Project" you mean "clear cutting project?" The Forest Service should resist the Trump administrations attempt to pay for their mismanagement with funds collected by destroying what is left of our forests. I have been in that area many times. It should be wilderness and not be a cash cow for a corrupt administration. I suggest you stall this until after the new president arrives. Biden will not allow this to happen. I can't believe that anyone would destroy this area for a cheap buck. Clear cutting the Nooksack is a crime. And really, be straight about what is intended - "Vege Management Project"

Looks like something the Trump admin would do, just lie yet again to get their way. I would hope that career Forest Service have a deeper integrity than that.
