Title:

Comments: Please do not allow clear cutting of this area. It is so beautiful and it is needed for a healthy ecosystem. We need forests to capture carbon, our planet is in peril due to raising carbon levels. Help protect our planet. We need sources of clean water, clear cutting disrupts the cycle of clean water.

The wildlife needs the forest to live. The animals will die without the forest. We have no right to sentence animals to death by taking away their home and food.
