First name: Amy

Last name: Mann

Organization: Caspian Management Corporation

Title: President

Comments: As president of a real estate management company, I certainly understand the need for sustainably harvested timber to maintain our construction economy. As a resident of Northwest Washington, however, I am deeply disturbed by this proposal. This is not a responsible or smart plan. I emphatically urge those in charge to complete a thorough EIS to evaluate how the proposed cutting would adversely impact our local environment and the broader climate in profound ways.

Thank you.
