Comments: Please, do not allow the proposed logging actions on the N. Fork Nooksack. If you do choose to move forward with this environmental abomination, I urge you to first complete and EIS! This is the only way to understand the true magnitude of the destruction that is proposed. The scale of the proposed devastation is unprecedented and so far from "norms" of USFS logging practices. Simply look at the vast amounts of tree farms and poorly-managed logged out landscapes to the west of the Nooksack to see what will become of the area. It is a sad state when the "rights" to Public Land are bought and sold as a commodity by a few, only to be abused and left in ruins for eternity for the very "public" that owns and loves the land.
