Comments: Hello! Thanks for taking the time to read this. I grew up on the Nooksack River and still have our family homestead there. After traveling the world and experiencing many locations, I have come to appreciate this land in the shadow of Mt. Baker as extremely unique and like nothing else. The biodiversity is vast and it sickens me to imagine it would get logged for profit. Due to the huge scale of proposed logging, its large departure from previous Forest Service management directions we've seen, its controversial nature, and negative impacts on local communities, an Environmental Impact Statement (EIS) must first be completed. Thank you for your consideration. It's in your hands and I hope you take the words of the community to heart.
