Comments: I am writing to express my opposition to the proposed North Fork Nooksack Vegetation Management Project (#58218). Particularly troubling is the proposed 1,881 acres of Stand Regeneration in the Matrix area especially the 575 acres in the Riparian Reserve. This has the potential to negatively impact water quality and fish habitat including habitat used by federally listed endangered Chinook salmon. I encourage the department to complete a thorough Environmental Impact Statement before embarking on this project.

Thank you for your time and consideration.
