Title:

Comments: It is my hope that an appropriate environment impact will be obtained before any harvesting or removal of forest vegetation occurs and that an appropriate assessment of tribal laws and policy are considered. It is also my hope that our green corridor is not diminished in any way. Please do your due diligence and consider the impact to our fragile environment and the rights and well being of the first environment and its inhabitants. Lining the pockets of big industry should not be your only consideration. Thanks for listening.
