Comments: Comments on proposed desecration of forest

This is not necessary and is strictly for money. Our nations forests, national forests, and parks are being raped of resources. I'm a 4th generation in Whatcom county. There are 2 generations here after myself. These forests are part of our heritage and very much loved, revered and used through recreation. It would be an injustice to continue to decimate natural forests for greed and corporate profits. Do not approve this vicious logging project.

Jay & Leslie Pederson
