Comments: Please do not log in the Canyon Creek Drainage. I am voicing my strong opposition to any clearcut logging in the Canyon creek drainage. This area is important to many different human user groups. Clearcutting is not the answer in a headwater drainage, clearly you understand this ? This all seems like someone is getting payed off to make this decision or is it the current administration attempting to fit this in before they are ousted? The community that uses this section of forest does not want you to log it.
