Comments: I wish to let it be known that I am against this project. I use this area and can't see how this project will help the animals. We are losing so much habitat everywhere these days we need our forests to be untouched the intrusion by machines and humans to do this is just too much keep this area as it is. Birds that need large tracts of old growth forest will not be helped by putting in roads and more access to the area. I do think replacing the bridge is the only project that should be done.
