First name: Christopher

Last name: Dick

Organization: The Cave Rover Project

Title: Founder

Comments: While reviewing some of the point overview of prohibited activities, I wanted to note the importance of additional statement of "without authorization" or similar. To allow for situations such as with prior authorization for an activity such as digging or temporary anchor if within a prior authorized permit (such as research, scientific or exploration access, such as for scientific study). Other examples would be situations that become authorized during said situation such as digging, anchors, excavating, mechanical vehicles during an active search, rescue, recovery or other emergency.
